Tamil Nadu, India

PROFILE

B.Tech graduate in AI & Data Science skilled in Python, Laravel, React.js, and the MERN stack. Experienced in building ETL pipelines, predictive dashboards, and full-stack RESTful applications — delivering end-to-end data and web solutions.

TECHNICAL SKILLS

Languages: Python (Pandas, NumPy, scikit-learn), React, PHP, JavaScript (ES6+)

Data/ML: Airflow, dbt, Snowflake, Spark/PySpark, CNN, YOLO, OpenCV, NLP (TF-IDF, Sentiment), Anomaly Detection

Web/Full-Stack: MERN Stack (MongoDB, Express, React, Node), Laravel (MVC, Eloquent, Migrations), RESTful APIs, HTML/CSS, Laravel Herd

BI/Domain: Power BI, Streamlit, Plotly, Matplotlib, GIS/QGIS (NDVI, Remote Sensing), IoT/Robotics (Arduino, ESP32, Raspberry Pi)

INTERSHIPS & EXPERIENCE

Full-Stack Web Development Trainee | ICEICO Technologies, Nagpur

Apr 2026 – Present

- Engineered a production-ready web application using Laravel (backend) and React.js (frontend), connected via secure, scalable RESTful APIs.
- Designed database schemas with Laravel Migrations, enforcing data integrity via Eloquent ORM and custom Form Requests.
- Developed a MERN Stack E-Commerce app (JWT auth, cart, catalog management); streamlined local workflows by migrating environments from XAMPP to Laravel Herd.

Senior Technical Supervisor & Training Specialist | Vellora Smart Kid (EduTech)

Jul 2024 – May 2025

- Resolved 20+ IoT/robotics hardware-software issues with a 98% first-contact resolution rate, improving user satisfaction by 22%.
- Mentored 50+ students/educators in STEM principles and created comprehensive troubleshooting documentation for sustainable knowledge transfer.

Computer Vision Intern | Zetspire Technologies

5-Day Program

- Implemented object detection, Canny edge filtering, and contour analysis using Python & OpenCV on real image data.

PROJECTS

Full-Stack E-Commerce & Service Platform (MERN Stack) | <https://quantum-desk-nu.vercel.app/> |

Apr 2026

- Developed a multi-role platform (Customer/Admin/Technician) with secure JWT authentication and role-based access control.
- Engineered a Service Management module for booking technicians with real-time request tracking and status updates.
- Architected 20+ RESTful APIs (Node.js/Express/MongoDB Atlas) integrated into a responsive React.js frontend with sub-2s load times.

Geospatial Analytics Platform – Water Resource Mgmt (Python, Streamlit, SQL)

Dec 2025

- Processed 1.2M+ satellite data points across 108 water bodies; built ETL workflow integrating NDVI/SAR indices with temporal analysis.

Object Detection Platform (YOLOv8, PyTorch, MLOps)

Oct 2025

- Built a multi-class detection pipeline over 5,000+ images achieving 91% mAP; designed as reusable framework for QC automation & visual search.

IoT & Computer Vision Systems (Arduino, OpenCV, Python)

2024

- 4WD Robot:** Integrated 5 sensor types (ultrasonic, IR, gyro, accelerometer, camera) for obstacle avoidance and path optimization.
- QR Door Lock:** Developed smart lock using OpenCV QR validation & Tkinter GUI with automated email alerts.
Published: J. Cryptography & Network Security (2024).

EDUCATION

B.Tech – Artificial Intelligence & Data Science | Sethu Institute of Technology, Madurai, Tamil Nadu

CGPA: 8.0/10 2021 – 2025

C.S. Ramachary Memorial Matriculation Higher Secondary School, Madurai, Tamil Nadu

HSC: 84% 2019 – 2021

Linga Matriculation School, Thirumangalam, Madurai, Tamilnadu

SSLC: 80.2% 2019
